Media Buying

Media buying, a core part of the advertising process, is as much a skill as it's an art. There's a lot that goes into the process of developing a customised media mix and strategy for each client.

Analyze

When working with a new client our first step is to take a deep dive into the brand from both an analytical and holistic perspective. We believe that to succeed as your marketing partner, transparency is of paramount importance.

Develop Customer Profile

From the info we gathered in the analysis phase, we develop a robust customer profile. To construct a successful marketing campaign, we must first profile what character traits the ideal customer has.

Implement

Once we've successfully identified a winning customer profile, we start to build out a series of data-based audiences to acquire new customers within identified channels..
